# CD Scratch Art

1: Paint your CD & allow to dry.

We used just black, but you can use all sorts of colours to make yours more beautiful

2: Once fully dry, you can now scratch your design into it using a paperclip which you have partially opened out

3: Why not try this?.... you can use your CD art as the centre of a flower perhaps.

Cut out large petals from some card, decorate and stick to the back of your CD
