

# MAKE: Shark

the scrapstore

## You will need:

- Large foam tube
- Small blue foam tube
- Black sock
- Card or flat foam for fin

1: **With the open slot towards the bottom**, cut the foam tube to make the shark snout.

*(Tip: a bread knife works well – ask an adult for help)*

Draw around blue foam and cut 2 holes – one on each side – for the eyes. Slot in a small piece of blue foam.

Next, cut out 2 triangles, as shown above, to form the gills.

Check out our YouTube tutorial!

2: Cut out a fin shape from the thin black foam or a piece of card.

Make a slot in the top of your shark & pop in your fin.

Cut finger holes in the tip of the black sock so you can wear the sock like a fingerless glove.

Pop your shark over your arm & wiggle your fingers as the teeth!

*When you've finished, why not create a story? What adventures will you have ?*

**Alternative:** Check out how to make a rocket flinger instead, using this QR code!
